	Highlights	•	3
1.	Federal order minimum Class I prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, March		5
2.	Federal order minimum Class and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, and butterfat differentials, March	•	6
3.	Federal order minimum Class I and blend prices for milk of 3.5 percent butterfat content, f.o.b. market or other indicated point, February-March averages	•	8
4.	Number of producers delivering milk to handlers regulated under Federal orders, total deliveries, and average daily deliveries per producer, March		10
5.	Producer milk deliveries used in Class I and gross Class I sales by handlers regulated under Federal Orders, March		12
6.	Producer milk deliveries to handlers regulated under Federal orders and deliveries used in Class I February-March		14
7.	Total fluid items, whole milk, skim milk items, milk and cream mixtures, and cream sold in marketing areas defined by Federal milk orders, for markets where such information is available, February, with comparisons	•	16
8.	Federal milk order Class I formula price information, March		20
9.	Prices and economic indexes used in Federal milk order formulas to determine March prices, with comparisons	•	22
10.	Federal order base and excess prices for milk of 3.5 percent butterfat content, March		23
11.	Seasonal incentive fund included under various Federal milk orders, March		23
12.	Filled and imitation milk sales in Federal milk order markets, January, February, and March 1969		23
	Major order actions, March		24

Highlights

MARCH 1969

Producer Deliveries. A total of 106,353 producers delivered 3.9 billion pounds of milk to regulated handlers in 60 comparable markets during March 1969. This is 2.9 percent above producer deliveries in March 1968. Average daily delivery per producer increased from 1,107 pounds in March 1968 to 1,185 pounds in March of this year. Producer numbers, producer deliveries, average butterfat percentages, and average daily deliveries per producer for individual markets are shown on table 4.

Producer Deliveries Used in Class I. The volume of producer deliveries used in Class I in 60 markets increased 2.0 percent from last year, to a total of 2.5 billion pounds for the month of March 1969.

Gross Class I sales, which comprise total Class I sales by regulated handlers, in-andout of defined marketing areas, increased 2.2 percent in the 60 markets for the month of March.

<u>Percentage of Producer Deliveries Used in Class I.</u> The average utilization percentage for March 1969 was 65 percent, the same as last year. Eighteen markets showed an increase in the utilization percentage, eight showed no change, and the remaining 34 markets showed a decrease (See table 5).

Minimum Prices. The weighted average Class I price paid by handlers in the 60 markets for 3.5 percent milk was \$6.57 per hundredweight, 46 cents higher than the \$6.11 per hundredweight price in March 1968. Minimum Class I prices for March this year were higher in all 60 markets.

Producers in the 60 markets received a weighted average blend price of \$5.72 per hundredweight for 3.5 percent milk, 36 cents higher than the \$5.36 price received by producers in March 1968. Producers received a higher blend price in 57 markets and a lower price in the remaining three markets. Class prices, blend prices, and associated butterfat differentials, by markets are reported on table 2.

Fluid Milk Sales. Total in-area fluid milk sales for March 1969 in 61 marketing areas are estimated to be about 2.6 billion pounds, 0.3 percent above such sales in March of last year. Complete February in-area sales for total fluid items, and for the four major fluid product groupings (whole milk, skim milk items, mixutres, and cream), are reported on table 7.

Filled and Imitation Milk Sales. Survey data of filled and imitation milk sales in Federal order markets, January, February, and March 1969 are presented on table 12.

YEAR TO DATE

Minimum Prices. The weighted average Class I price for the January-March period for the 60 markets was \$6.57, 46 cents higher than the \$6.11 for the same period in 1968. The 1969 weighted average blend price was \$5.81, 37 cents higher than the blend price of \$5.44 reported for the same period in 1968 (See table 3).

Producer Deliveries and Deliveries Used in Class I. Producer deliveries and deliveries used in Class I are reported for individual markets on table 6. In the first three months of this year, compared to the same period in 1968, producer deliveries for the 60 markets were up 2.9 percent, and deliveries used in Class I were up 2.5 percent.1/ Data for the 60 markets and for all markets are summarized below:

MAJOR ORDER ACTIONS, MARCH 1969

Amendment:

Corpus Christi - March 1 (34 FR 3676, 3/1/69). A distributing plant must have route disposition of at least 50 percent of its "Grade A" receipts during the month. At least 10 percent of such receipts must be disposed of on routes in the marketing area. A supply plant must ship at least 50 percent of its "Grade A" receipts to pool distributing plants during the month. If this requirement is met during each of the months of September through December, the plant has automatic pool plant status during the months of January through August. A cooperative association plant would qualify for pooling if 50 percent of its producer-member milk is received at pool distributing plants of other handlers or is transferred to such pool plants from a plant of the cooperative association.

A <u>producer-handler</u> is defined as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant, and who receives no milk from other dairy farmers or from sources other than pool plants. He disposes of no other source milk as Class I milk except that represented by nonfat solids used in the fortification of fluid milk products, or yogurt in packaged form and cream in prepackaged tetrapaks, if classified and priced under any Federal order. Receipts of fluid milk products from pool plants are limited to the lesser of 10,000 pounds or five percent of his Class I disposition each month.

A handler or a cooperative association may divert to nonpool plants, not more than one-third of the total milk from producers during the month.

Order revised to provide for the marketwide pooling of returns to producers instead of individual handler pooling.

Order revised to provide for three classes of utilization instead of two. Class I milk is all skim milk and butterfat disposed of in the form of a fluid milk product, in end-of-month inventory of packaged fluid milk products, and not accounted for as Class II or Class III milk. Class II milk is all skim milk and butterfat in fluid milk products used to produce or added to cottage cheese or cottage cheese curd. Class III milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product or cottage cheese; in fluid milk products or cottage cheese dumped or disposed of for livestock feed; disposed of in bulk to commercial food processors; in end-of-month inventory of bulk fluid milk products; in any fluid milk product which has been fortified with additional milk solids not fat and is not accounted for as Class I; and, in shrinkage.

The Class II milk price is the Class III milk price for the month plus 25 cents. For the months of July through February, the Class III milk price is the butter-powder formula price. For the months of March through June, 12 cents is deducted from such price. The butterfat differential for Class II and Class III is the Chicago 92-score butter price for the current month times 0.110.

The <u>Class I price</u> for the current month is to be announced on or before the fifth day of each month instead of the sixth day.

MAJOR ORDER ACTIONS, MARCH 1969 -CONTINUED

New Order:

Georgia - March 1 (34 FR 2541, 2/25/69). (Pricing provisions are effective April 1, 1969). The "Georgia" marketing area includes all of the territory within the boundaries of the State of Georgia except the counties of Catoosa, Chattooga, Dade, Fannin, Floyd, Gilmer, Gordon, Murray, Pickens, Rabun, Union, Walker, and Whitfield. Population (1960 Census) 3,661,806.

The order defines a handler as the operator of a pool plant, a partially regulated distributing plant, or an other order plant; a producer-handler or a cooperative association. A producer-handler is defined as any person who operates, as his personal enterprise and at his personal risk, a dairy farm and a distributing plant, who receives no milk from other dairy farmers or from sources other than pool plants, and who disposes of no other source milk as Class I milk.

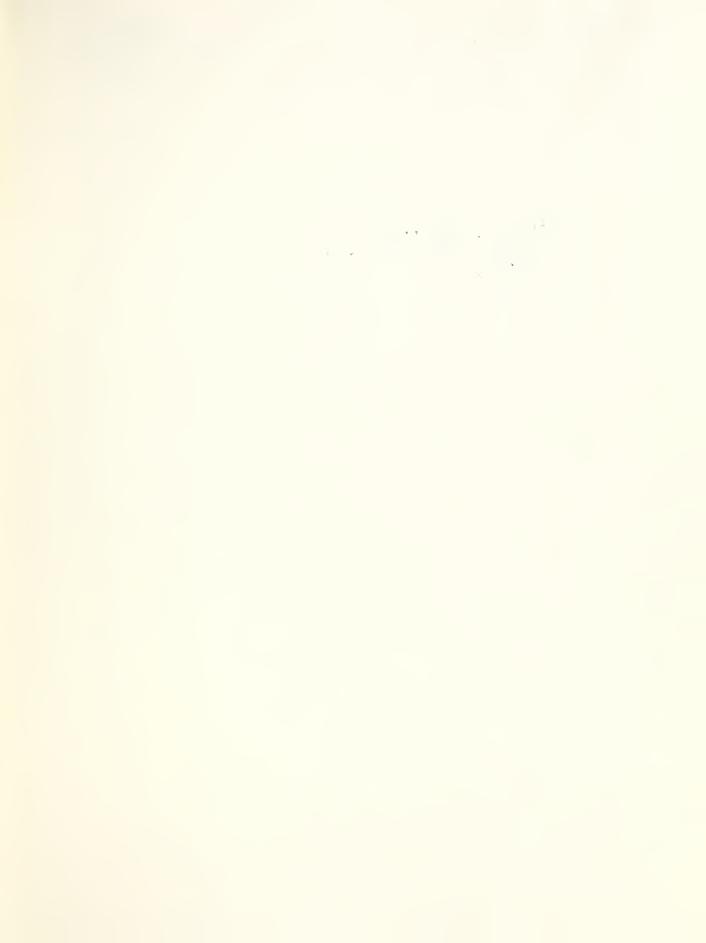

A handler or a cooperative association may divert to nonpool plants, up to 25 percent of the total milk from producers during the month. At least 10 days' production of a producer must be received at a pool plant during the month to qualify any of his production in the same month for diversion.

A distributing plant must have route disposition of at least 50 percent of its "Grade A" receipts during the month. At least 15 percent of such receipts must be disposed of on routes in the marketing area. A supply plant must ship at least 50 percent of its "Grade A" receipts each month to pool distributing plants. If this requirement is met during each of the months of August through February, the plant has automatic pool plant status during the months of March through July. Definition of a nonpool plant includes an other order plant, a producer-handler plant, a partially regulated distributing plant, an unregulated supply plant, and an exempt distributing plant.

The <u>Class I price</u> for the current month is to be announced on or before the fifth day of each month. The uniform price for the preceding month is to be announced on or before the 11th day of each month.

Class I milk is all skim milk and butterfat disposed of in the form of fluid milk products, in packaged fluid milk products in inventory at the end of the month, and not accounted for as Class II milk. Class II milk is all skim milk and butterfat: Used to produce any product other than a fluid milk product; disposed of in bulk form to commercial food processors; dumped or disposed of for livestock feed; in inventory of bulk fluid milk products at the end of the month; and, in shrinkage. Class II milk also includes skim milk represented by the nonfat solids used to produce reconstituted buttermilk or added to a fluid milk product which is in excess of an equivalent volume of such product prior to the addition.
